AIM:

The aim is to design input forms that validate data, such as email and phone number, and

display error messages using HTML/CSS and JavaScript with Validator.js.

PROCEDURE:

Step 1: Setting Up the HTML Form

Start by creating an HTML form with input fields for the email and phone number.

html

```
<!DOCTYPE html>
```

```
<html lang="en">
```

```
<head>
```

```
<meta charset="UTF-8">
```

```
<meta name="viewport" content="width=device-width, initial-scale=1.0">
```

```
<title>Form Validation</title>
```

```
<link rel="stylesheet" href="style.css">
```

```
</head>
```

```
<body>
```

```
<div class="container">
```

```
<form id="myForm">
```

```
<label for="email">Email:</label>
```

```
<input type="email" id="email" name="email" required>
```

```
<span id="emailError" class="error"></span>
```

```
<label for="phone">Phone Number:</label>
```

```
<input type="text" id="phone" name="phone" required>
```

```
<span id="phoneError" class="error"></span>
```

```
<button type="submit">Submit</button>
```

```
</form>
```

```
</div>
```

```
<script
```

```
src="https://cdnjs.cloudflare.com/ajax/libs/validator/13.6.0/validator.min.js"></script>
```

```
<script src="script.js"></script>
```

```
</body>
```

```
</html>
```

Step 2: Styling the Form with CSS

Next, add some basic styling to make the form look nice.

css

```
style.css */
```

```
body {
```

```
font-family: Arial,sans-serif;
```

```
background-color: #f4f4f4;
```

```
display: flex;
```

```
justify-content: center;
```

```
align-items: center;
```

```
height: 100vh;
```

```
margin: 0;
```

```
}
```

```
/*
```

```
.container {
```

```
background-color: white;
```

```
padding: 20px;
```

```
border-radius: 5px;
```

```
box-shadow: 0 0 10px rgba(0, 0, 0, 0.1);
```

```
}
```

```
form {
```

```
display: flex;
```

```
flex-direction: column;
```

```
}
```

```
label {
```

```
margin-bottom: 5px;
```

```
}
```

```
input {
```

```
margin-bottom: 10px;
```

```
padding: 10px;
```

```
border: 1px solid #ccc;
```

```
border-radius: 3px;
```

```
}
```

```
button {  
padding: 10px;  
background-color: #28a745;  
color: white;  
border: none;
```

```
border-radius: 3px;  
cursor: pointer;  
}
```

```
button:hover {  
background-color: #218838;  
}
```

```
.error {  
color: red;  
font-size: 0.875em;  
}
```

Step 3: Adding JavaScript for Validation

Finally, add JavaScript to validate the input fields using Validator.js and display error messages.

```
javascript  
script.js */
```

```
document.getElementById('myForm').addEventListener('submit', function (e) {  
  e.preventDefault();
```

```
  let email = document.getElementById('email').value;
```

```
  let phone = document.getElementById('phone').value;
```

```
  let emailError = document.getElementById('emailError');
```

```
  let phoneError = document.getElementById('phoneError');
```

```
  // Clear previous error messages
```

```
  emailError.textContent = '';
```

```
  /*
```

```
  phoneError.textContent = '';
```

```
  // Validate email
```

```
  if (!validator.isEmail(email)) {
```

```
    emailError.textContent = 'Please enter a valid email address.';
```

```
  }
```

```
  // Validate phone number
```

```
  if (!validator.isMobilePhone(phone, 'any')) {
```

```
    phoneError.textContent = 'Please enter a valid phone number.';
```

```
  }
```

```
  // If no errors, submit the form (for demonstration purposes, we'll just log the  
  values)
```

```
  if (validator.isEmail(email) && validator.isMobilePhone(phone, 'any')) {
```

```
    console.log('Email:', email);
```

```
    console.log('Phone:', phone);
```

```
  }
```

```
});
```
